Biobank Survey

Please complete the survey below.

Thank you!

Response was added on 10/02/2026 2:40pm.

As part of our NICHD-funded, COPPER (Collaborative Online Perinatal & PEdiatric Repository) project, we are surveying networks, foundations, and researchers involved in maternal and pediatric research. We are seeking to identify available biospecimens and associated data for collaborative research.

Our overarching objective is to develop a centralized listing of biobanks and other sources of biospecimens and data (for example, left-over specimens from clinical trials) to support maternal-pediatric collaborations and conduct critical review of associated governances, consents, ethical documents, and resources available from maternal-pediatric biorepositories.

This database of studies with stored biologic specimens and publicly available data eventually will be made available through the MPRINT Hub website. This could generate great interest in new and innovative uses for existing biospecimens and data and allow for translation of findings much more quickly than with conventional new cohort recruitment.

What is the name of your Biobank?	CARRA Biorepository
Please write out the email of the person to contact/redirect this survey to: (Only if applicable)	_____

Biobank characteristics

What type of biospecimens do you have available (e.g. urine, blood, placental tissue, breast milk, etc.)?	☐ Blood (Maternal or Child) ☐ Cord blood ☐ Urine ☐ Placental tissue ☐ Breast Milk ☐ DNA/Genomic data ☐ Other ((Check all that apply))

What type of biospecimens do you have available?	☐ Blood (Maternal or Child) ☐ Cord blood ☐ Urine ☐ Placental tissue ☐ Breast Milk ☐ DNA/Genomic data ☒ Other ((Check all that apply))
Other:	Plasma, Serum, Cells, DNA, RNA
How many participants have been recruited (approximately)?	_____
Approximately how many participants have been recruited?	◯ 0 - 100 ◯ 101 - 5,000 ⊗ 5001+ ◯ N/A
How many biospecimens have been collected (approximately)?	_____
Approximately how many biospecimens have been collected?	◯ 0 - 500 ⊗ 501 - 5,000 ◯ 5,001 - 20,000 ◯ 20,000+ ◯ N/A
How many of the specimens are or could be made available to other researchers.	◯ All (>90%) specimens are available ⊗ Most (50-90%) specimens are available ◯ Some (< 50%) specimens are available ◯ Specimens are NOT available to other investigators
How old are the participants from whom biospecimens were taken?	☐ 0-30 days ☐ 31 days-2 years ☐ 2-5 years ☐ 5-18 years ☐ 18-45 years ☐ 45+ years ((Check all that apply))
How old are the participants from whom biospecimens were taken?	☐ 0-30 days ☐ 31 days-2 years ☐ 2-5 years ☐ 5-18 years ☐ 18-45 years ☐ 45+ years ☐ N/A ((Check all that apply))
If your biobank contains obstetric-associated samples, when were the samples collected?	☐ Before pregnancy ☐ 1st trimester ☐ 2nd trimester ☐ 3rd trimester ☐ Postpartum ((Check all that apply))

If your biobank contains obstetric-associated samples, when were the samples collected?	☐ Before pregnancy ☐ 1st trimester ☐ 2nd trimester ☐ 3rd trimester ☐ Postpartum ☐ N/A / No obstetric samples collected ((Check all that apply))
What type of associated data could you provide with the samples? (Clinical, Molecular, etc)	☐ Demographic ☐ Clinical ☐ Molecular/Analytes ☐ Other ((Check all that apply))
What type of associated data could you provide with the samples?	☐ Demographic ☐ Clinical ☐ Molecular/Analytes ☐ Other ☐ N/A ((Check all that apply))
What was the time period of specimen collection? (Range of years)	_____
When did sample collection begin?	◯ < 2000 ◯ 2001 ◯ 2002 ◯ 2003 ◯ 2004 ◯ 2005 ◯ 2006 ◯ 2007 ◯ 2008 ◯ 2009 ◯ 2010 ◯ 2011 ◯ 2012 ◯ 2013 ◯ 2014 ◯ 2015 ⊗ 2016 ◯ 2017 ◯ 2018 ◯ 2019 ◯ 2020 ◯ 2021 ◯ 2022 ◯ 2023 ◯ 2024 ◯ N/A

When did sample collection end?	◯ < 2000 ◯ 2001 ◯ 2002 ◯ 2003 ◯ 2004 ◯ 2005 ◯ 2006 ◯ 2007 ◯ 2008 ◯ 2009 ◯ 2010 ◯ 2011 ◯ 2012 ◯ 2013 ◯ 2014 ◯ 2015 ◯ 2016 ◯ 2017 ◯ 2018 ◯ 2019 ◯ 2020 ◯ 2021 ◯ 2022 ◯ 2023 ◯ 2024 ⊗ Ongoing ◯ N/A
Is collection of specimens still ongoing?	◯ Yes ◯ No
What is the race of the participants the biospecimens were collected from?	☐ American Indian or Alaska Native ☐ Asian ☐ Black or African American ☐ Native Hawaiian or Other Pacific Islander ☐ White ☐ Other ((Check all that apply))
What is the race of the participants the biospecimens were collected from?	☐ American Indian or Alaska Native ☐ Asian ☐ Black or African American ☐ Native Hawaiian or Other Pacific Islander ☐ White ☐ Other ☐ N/A ((Check all that apply))
Do you have participants that are Hispanic or Latinx?	⊗ Yes ◯ No
What are conditions of focus in your biobank?	☐ Healthy patients ☐ Hypertensive (Pre/eclampsia, Gestational Hypertension...) ☐ Endocrine (GDM, Maternal diabetes...) ☐ Respiratory ☐ Cardiovascular ☒ Other ((Check all that apply))

Other:	Pediatric Rheumatic Diseases (JIA, SLE, JDM, LS/SSc)
Please upload your collection/processing protocol:	
Alternatively, please provide the methods used to obtain the specimen.	_____
Alternatively, please provide the methods used to process the samples.	_____
How are the samples stored? (Size of aliquots, temperature of freezers, etc...)	_____
Approximate size of aliquot of stored samples	⊗ 250 microliter ◯ 500 microliter ◯ 1 milliliter ◯ Other ◯ N/A
Approximate temperature of stored samples	◯ -60 to -80 degrees Celsius ◯ -20 degrees Celsius ⊗ Liquid Nitrogen ◯ Other ◯ N/A
Please upload the informed consent form	
Comments:	Specimens are available to CARRA members for pediatric rheumatology research. For additional information, please contact the CARRA group. (NDA may be required for collaborations)
